

Assembly instructions

Hoopers Tunnel Bottomless with folding system

You will receive in one package:
2 x padded sheets, 1 x tunnel film,
5 x folding poles, 4 x metal anchors

Tip: Setting it up is easier in a team

1. Unpack the Hoopers tunnel and place all parts on the floor.
Then put the side bars together with the arches and set aside.

2. Place the Tarpaulin on the floor with the smooth side and the Velcro strip on the sides facing up.
Place a padded bar on the side and secure it with the Velcro strap.

3. Please carry out this step very carefully and press the Velcro strip firmly.

4. The entire bow with the Velcro strap enclose and press firmly.

5. When this side is finished, complete the work step repeat with the other side in the same way.

6. The tunnel can then be set up.
Now insert the 5 folding rods into the pockets provided.

First push it all the way into the bag without Velcro, then insert it into the bag with Velcro and close the Velcro tightly again.

7. Now lock the folding mechanism on the poles and the tunnel film will stretch.

If all 5 folding rods are installed correctly, the tunnel stands firmly on the ground and can also be fixed with the metal anchors.
